WO 2004/026735 A2

(54) Title: NOVEL DEVICE

(57) Abstract: Holding means for holding an article onto a conveyor system, particularly for holding pharmaceutical vials onto a conveyor system for performing a filling and sealing operation thereon. The holding means bears downwardly on the article. A conveyor system incorporating the holding means is also provided. In a further aspect an aerodynamically shrouded processing station for use with the conveyor is provided which minimises disruption of a downward laminar flow of purified air.
